

CARDIOLOGY CLINICAL STUDY FUND 2025

One of the objectives of the ESVC is “to encourage and promote improved methods of diagnosis, treatment and prevention of heart disease in animals”. In keeping with this goal, the ESVC has created a Clinical Study Fund.

The goal of this fund is to support high quality clinical research aimed at improving the diagnosis, treatment and prevention of cardiovascular diseases in animals.

Program description

- If ethical approval was not provided at the time of submission, it must be provided shortly after the grant has been awarded.
- A panel of recognized experts in veterinary cardiology appointed by the board will review all proposals according to a list of objective criteria.
- Final decision will be made by the ESVC board.
- Funding will be granted based on the scientific merit of the proposal and the availability of funding, after ranking the proposal accordingly.
- The fund will support up to two research project/year
- Duration of the project should be one year. If it is not possible to complete the project in one year, an application can be made for an extension for a second year. With this application, a progress report must be submitted at the end of the first year.
- Maximum funding: **total funding available is 20,000 Euro**
- Deadline for application: **May 31st 2025**
- Funding decision: Applicant will be informed of the decision by **October 31st, 2025**

Eligibility

- The principal investigator must be a member of the ESVC current with his membership
- Each ESVC member can submit only one application per year as principal investigator

Instructions for applications

- Applications should follow the template provided
- Applications should provide the following:
 - Proposal should be typed in Arial font 11 font size single space 2.5 cm (inch) margin, numbering consecutive pages from the Cover Page (page 1).
 - Statement of ethical approval either approved (provide decision letter) or pending
 - Cover letter (including the title)
 - Abstract
 - Background and significance
 - Hypothesis and aims
 - Materials and methods
 - Timeline
 - Possible benefit(s) of the study to the veterinary cardiology community
 - Detailed budget (a form is downloadable)
 - Publication aims in the future
 - References should be limited to 15
 - One page CV for principal investigator
- Applications should be submitted electronically to the secretary of ESVC

Reporting

- Progress report must be submitted at the end of the first year and at the two years if an extension has been approved.
- Final report must be submitted 1 year after the last progress report was submitted.
- The ESVC retains the right to ask that the funding be returned if it is not used in 2 years or if an adequate progress report is not submitted in a timely manner as required.

Review criteria

- Late submissions and those failing to comply with the requirements of this call will not be considered for award.
- Proposals will be reviewed by the ESVC Grant Committee.
- Proposals will be ranked by the committee on a scale of 1 (outstanding) to 5 (not acceptable).
- Funding will be allocated based on the order of rankings. In case of a tie, the ESVC Board will make the final decision
- The primary review criteria are as follows:
 - The scientific quality of the proposed project
 - Feasibility of the study
 - Demonstration of clinical relevance
 - Relevance of work to animal health and well being
